

New Library Resources for Science & Engineering

Cornell University
Library

These and many other resources can be accessed through the Engineering Library homepage:
engineering.library.cornell.edu

OnePetro (petrology)

OnePetro.org is a multi-society library that provides a simple way to search for and access a broad range of technical literature related to the oil and gas exploration and production industry. From one place, you can search documents from many different professional societies such as the Society of Petroleum Engineers (SPE) and the American Petroleum Institute (API).

SAE Digital Library (automotive & aerospace engineering)

The Society of Automotive Engineers (SAE) Digital Library gives access to thousands of SAE Technical Papers on a huge range of topics from 1998 to the present, including ground vehicles, aerospace, and aerospace materials.

SPIE (Society of Photo-Optical Engineers) (optics)

The SPIE Digital Library is the most extensive resource available on optics and photonics, provides access to more than 275,000 technical papers from SPIE Conference Proceedings and the 8 SPIE journals from 1990 to the present. More than 17,000 new research papers are added annually.

CRC NanoNetBase (nanoscience e-books)

This collection includes 110 e-books on nanoscale science. The collection includes sub-areas on nanotechnology, nanomaterials and structures, and mesoscale physics.

ASTM (technical standards)

The ASTM Standards and Engineering Digital Library is a vast collection of industry standards and technical information. The Library covers a broad range of engineering disciplines, including aerospace, biomedical, chemical, civil, environmental, geological, health and safety, industrial, materials science, mechanical, nuclear, petroleum, soil science, and solar generation.

CRC EngNetBase (engineering e-books)

This e-book collection includes over 1,800 cutting-edge references--especially engineering handbooks--in civil, mechanical, and electrical engineering, as well as telecommunications, electronics packaging and other areas.
