# Summon & The New Engineering Library Website

## Two New Tools for Online Research

### Summon [library.cornell.edu/summon](http://library.cornell.edu/summon)

Summon searches approximately 700 million items, including but not limited to:

- scholarly journal articles
- newspaper articles
- ebooks
- audio files
- video files

It does not yet include Cornell's library catalog.

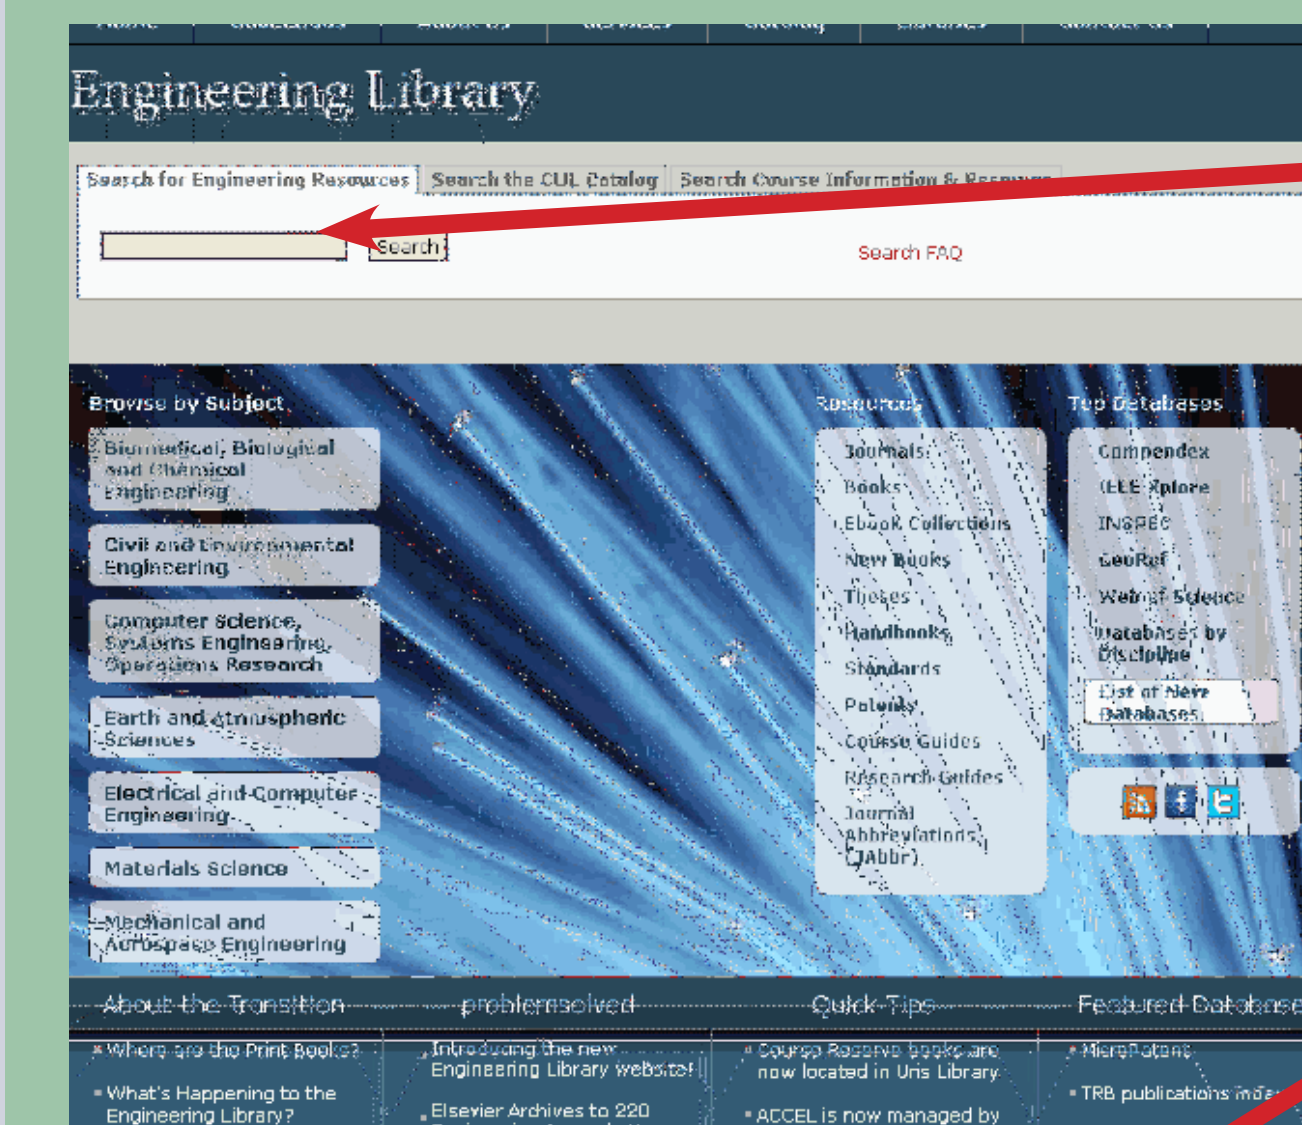

It draws from many databases as well as digital repositories and other archives on the web.

Questions or comments? Email [engrref@cornell](mailto:engrref@cornell) or see the librarians in Carpenter 103a and 103b.

### The New Engineering Library Website [engineering.library.cornell.edu](http://engineering.library.cornell.edu)

The new site for the Engineering Library includes a new search specially designed for students and researchers in engineering.

Input your search here.

You can then narrow down your search results using the facets on the left-hand side.

This searches books, ebooks, journals, databases, handbooks, standards and LibGuides, all in science and engineering.

It does not search articles: Use Engineering Village, IEEE Xplore or Summon for article searches.
